

# Danny Ru

Richmond Hill, ON

---

## Education

---

**Bachelor of Science: Double Major in Computer Science and Economics** 2017 -2021

University of Toronto

- Relevant coursework: Web Programming (A-), UX Design (A), Human Computer Interaction / User Interfaces (A), Software Tools & Systems Programming (A-)

## Projects

---

**React Movies App** June 2022

- Developed a Movie Search web application using React designed to simplify the movie browsing experience and view information about various movies.
- Organized data fetch from The Movie Database API into a modern and responsive UI.
- Utilized Sass/SCSS to efficiently organize stylesheets.

**Budget Tracker API** May 2022

- Developed an API using HTML5, CSS3, and JavaScript, that allows users to customize and track various sources of income and expenses for both personal and business budgets.
- Integrated a summary report and an automatic warning message trigger when spending hits a certain custom threshold.

**Restaurant Website** Apr 2022

- Developed a website for a local restaurant using HTML5, CSS3, JavaScript, and Bootstrap 5.
- Incorporated a landing page, searchable menu, food gallery, and contact page.
- Utilized flexbox and media queries within CSS to facilitate responsive web design.

## Activities

---

**UTM Capital** Sept 2020 – Apr 2021

Investments Analyst

- Perform equity research and analysis of financial statements for the healthcare sector of UTM's investment fund with the collaboration of fellow analysts.
- Responsible for organizing ratio and credit analysis of Bristol-Myers Squibb, the healthcare team's final recommendation and presenting the analyses to a panel of industry professionals.
- Placed 1<sup>st</sup> out of 6 teams in UTMCM's [final stock pitch](#) competition.

## Other Experience

---

**Mei Ling's Chinese Restaurant** Sept 2018 – Present

Food Courier

- Processed payments, packaged food orders, and delivered orders to residential customers. Increased time-savings with strategic allocation of order timeslots & pre-planning delivery routes.
- Cost savings initiative by eliminating the former web design vendor and implementing a new restaurant website in-house.
